Question No: 54 (Marks: 10)

What is the effect of given adjustments on Trading & Profit & Loss account and Balance Sheet?

- a. Accrued Expenses or Outstanding Expenses
- b. Prepaid Expenses or Unexpired Expenses
- c. Accrued Revenue or Revenue Receivable
- d. Unearned Revenue or Revenue Received in Advance
- e. Depreciation of Asset

1. Accrued Expenses or Outstanding Expenses

Trading and profit and loss account effect

These expenses will be shown in profit and loss account under administrative expenses and will be deducted from gross profit. They will be used to calculate net profit

Balance sheet effect

These expenses will be shown as expense payable or accrued expenses in balance sheet as current liabilities and will be shown under current liabilities section of liabilities as they have to be paid by business..

2. Prepaid Expenses or Unexpired Expenses

Trading and profit and loss account effect

These will be deducted from relevant expense account to get the actual expenses for the period and that actual amount of expense will be deducted from gross profit to arrive at net profit. This amount of prepaid expenses will not be included in profit and loss account as an expense itself but its effect will be on current expenses for the period for which profit and loss is being calculated.

Balance sheet effect

These prepaid expenses will be shown as current assets in balance sheet and will be shown under the section of current assets in balance sheet.

3. Accrued Revenue or Revenue Receivable

Trading and profit and loss account effect

These will be added to sales in trading account in profit and loss statement and will be treated as a revenue in the calculation of gross profit by subtracting cost of goods sold from net sales. This will affect gross profit in trading account.

Balance sheet effect

In balance sheet this revenue will be shown under current assets as receivables from debtors and will be shown under the section of current assets of the business.

4. Unearned Revenue or Revenue Received in Advance

Trading and profit and loss account effect

This will not be added to the sales as sales is recognized when the actual services have been provided or when goods have been shipped irrespective of whether payment has been received or not. So this will not affect profit and loss account as it is still not recognized as sales/revenue.

Balance sheet effect

This is a liability for the company because the company has to give goods or services to the buyer for the advance payment done by the buyer and will be shown as a liability in the balance sheet under the current liability section of balance sheet. Also the same amount will be shown in the bank or cash as current asset to offset the liability because the cash or cheque has been received for goods not given or services not rendered yet.

5. Depreciation of Asset

Trading and profit and loss account effect

The depreciation of asset is an operating expense for the business and will affect profit and loss account. It will be added to the administrative expense and will appear in the administrative expense section of profit and loss account and will be deducted from gross profits to arrive at net profits along with other expenses.

Balance sheet effect

In balance sheet it will appear as deduction from the fixed asset as the fixed assets in balance sheet will be shown at written down value. So this will be added to previous balance of accumulated depreciation and will be deducted from the total cost of the fixed assets and will appear in the assets section under the heading of fixed asset. It might appear in notes as sometimes in balance sheet summarized figure of fixed asset at WDV will be shown. In any case it is deducted from fixed asset in balance sheet and affects the total assets side

Accounts Payable:

Liabilities are debts. The person or organization to which the debt is owed is called creditors. All businesses have liabilities; even the most successful companies purchase stocks, supplies, and services on credit. The liabilities arising from such purchases are called accounts payable. For example, if a person A is our creditor and we have to return his money so he it is recorded in our books as accounts payable.

Accounts Receivable:

Debtors are the person from whom our money is receivable. He has to return our money which he had borrowed from us at sometime. Such money or accounts are called Accounts receivable. For example A person named A is our debtor so he is recorded in our book as the account receivable.
